WORK EXPERIENCE

Operations Specialist

05/2025 – 01/2026

Nu10 

Remote

- Created and managed 120+ intents across multiple projects in Azure Language Studio, aligned with defined business scenarios.
- Analyzed business requirements and translated them into intent structures and conversational flows.
- Tested and optimized intent performance, reducing misclassification and operational issues by 25%.
- Supported ongoing operations by monitoring intent behavior and implementing updates to maintain 90%+ quality standards.

IVR Developer

05/2022 – 01/2025

SmartConnect Technologies 

Thane

- Architected and maintained high-availability IVR workflows for a major entertainment client, utilizing JSP, JavaScript and Genesys Composer to build robust, scalable call-routing architectures that support enterprise-level traffic.
- Orchestrated the gathering of business requirements and technical constraints from external departments to engineer custom routing logic, successfully navigating rapid-response sprint cycles to address urgent business needs without compromising system stability.
- Led a major cleanup of the development environment, identifying and removing 12+ months of unreleased legacy code by analyzing Java libraries, which improved system stability and reduced deployment overhead
- Engineered a custom "IVR Bypass" feature, enabling intelligent direct-to-agent routing during low-volume periods, which enhanced customer satisfaction and optimized agent utilization by 30%.
- Mitigated critical data loss risks by reverse-engineering VXML structures to restore workflows where no native recovery methods existed, ensuring 100% business continuity.

EDUCATION

Master of Science in Computer Applications (MSC-CA)

08/2022 – 08/2024

Tilak Maharashtra Vidyapeeth

Pune, India

CGPA: 6.74

Bachelor of Computer Applications (BCA)

06/2019 – 06/2022

Tilak Maharashtra Vidyapeeth

Pune, India

CGPA: 7.39

SKILLS SUMMARY

Languages

Python, SQL, C++, NoSQL, JavaScript

Frameworks

Pandas, NumPy, Flask, Jinja2.

Tools

SQLite, Oracle, MongoDB, Git, Docker.

Genesys

Genesys Composer, OPM, CME, GA.

Gen AI

Crewai, Langchain, VectorDB, LLM, LocalLLM,RAG

PROJECTS

QA Testing AI Team

06/2026

Python, CrewAI, Google Gemini (LLM), MCP (Model Context Protocol), Pydantic, MultiAgents.

- Addressing the slow, inconsistent process of manually reviewing unfamiliar codebases to design test strategies and write test cases before QA work can even begin.
- Engineered a multi-agent automation pipeline using CrewAI with three sequential agents (repository analyst, test strategy planner, test writer), integrating GitHub's MCP server for repo analysis and a Filesystem MCP server for structured output, powered by Google Gemini

Notes APP

01/2025 – 02/2025

Python, Flask,JWT,SQLAlchemy,SQL,Docker,Git,Bootstrap,Jinja2

- To bridge the gap between theoretical backend concepts and practical implementation by architecting a full-stack CRUD system that manages complex state and relational data persistence.
- Engineered a full-stack CRUD application featuring a unified RESTful API and a responsive jinja2 web interface, leveraging Flask-SQLAlchemy for relational data persistence in an OracleDB environment and JWT for secure, stateless user authentication.

Smart Parking System

02/2024 – 04/2024

Python,OpenCV,YOLOv8,EasyOCR,MongoDB,Computer Vision

- Resolving operational bottlenecks and congestion in high-volume parking facilities caused by manual entry/exit verification and inefficient record-keeping.
- Engineered a real-time automation pipeline using YOLOv8 for vehicle localization and EasyOCR for license plate digitization, enabling seamless data storage in MongoDB to eliminate manual tracking and calculation errors
- Achieved a 96% mAP (mean Average Precision) for vehicle detection and 85% OCR accuracy on license plates, resulting in a 40% reduction in vehicle processing time at entry gates.

CERTIFICATES

- | | | |
|--|--|---|
| • Rest API With Flask and Python Udemy | • Artificial Intelligence Fundamentals IBM | • Data Analysis with Python GeeksforGeeks |
| • Google Gen AI Academy | • Generative AI Foundations Microsoft | |
